# Clinical Trials

## Department of Oncology

627,000 potential  
Clinical Trial Patients  
**29,000+ yearly consultations**

Cancer of the bladder, prostate or kidney

Cancer of the esophagus, stomach, small intestine or colon

Breast Cancer

Malignant melanoma

# How we make it possible

15 full-time equivalents who work exclusively on the conduct of clinical trials

All physicians affiliated with the department are certified in Good Clinical Practice (GCP)

Weekly multidisciplinary treatment meetings ensures that no potential subject is left behind

Dedicated examination and consultation room for clinical trial visits

Dedicated laboratory facilities for processing central laboratory samples

NS-EN ISO/IEC 15189 Certified Local Laboratory and department of Pathology

The Imaging department can provide protocol adapted nuclear medicine, CT, MRI, X-ray, and ultrasound examinations

Simplified classification, treatment, and reporting of Serious Adverse Events (SAEs) with our own in-patient ward

Patient Travels in Norway is mostly covered by "Pasientreiser" and eligible patients will travel to and from the hospital, almost free of charge

## ONE HOSPITAL, FOUR LOCATIONS

Akershus University Hospital (Ahus) is a local and area hospital for approximately 627,000 inhabitants. Potential Clinical Trial Patients can be enrolled from any of our four locations. Additionally, national infrastructure enables nationwide recruitment
