What is NorTrials?

- Launched as part of the ambitious strategic plan promoted by the Norwegian Ministry of Health and Care Services to strengthen Norway as a country of excellence for performing clinical trials.
- Represents a public-private partnership between the Norwegian healthcare system and the healthcare industry.
- NorTrials Coordinating Unit is the operational structure for the follow-up of the six NorTrials centres and national support for industry initiated clinical trials.
- NorTrials will benefit from the Norwegian healthcare system and infrastructure.

Why NorTrials?

- Give patients increased access to investigational treatment throughout the country.
- A national entry point for healthcare industry who wants to conduct clinical trials in Norway.
- Dedicated NorTrials contact persons throughout the Norwegian healthcare system, prepared for dialogue with the health industry upon request.
- Facilitation of collaboration between study sites for all therapeutic areas and clinical trial phases.

How to succeed?

- Prepare the Norwegian healthcare system for an increase in number of clinical trials.
- Promote Norway as a preferred country for performing clinical trials for the health industry.
